Fig. 1 - Architecture and data flow

Left-to-right schematic: stereo image pairs + calibration -> pluggable correspondence strategy -> CorrespondenceSet isolation wall -> DLT triangulation -> 3D displacement -> plane-fit Green-Lagrange strain -> visualization/export. Qt-free compute core banded separately from the GUI/viz layer; al-dic 2D engine shown as a pinned external library.

Data / script: No data - schematic (repro/fig1_architecture.py).
