

PLACEHOLDER

Fig. 2 - Built-in calibration and QC

- (a) Coded circular target with the three ring fiducials + detected dots.
- (b) Board-pose coverage and tilt range over the image frame.
- (c) Per-pair reprojection RMS bar chart with rejected pairs marked.
- (d) QC summary: stereo RMS, epipolar RMS, baseline, pairs used/total, pitch closure 7.0005 mm and the +0.06% baseline agreement with DICE.

Data / script: tools/calib_report.py on the author's real coded-target photo set.
