

PLACEHOLDER

Fig. 8 - Scale and performance

- (a) Peak RSS vs frame index for the 150 x 12 Mpx and 400 x 5 Mpx runs (lazy streaming keeps memory flat). (b) Per-frame tracking time. (c) End-frame error vs frame index (no drift). (d) Kernel speedups: strain 6.5-19x (agreement $< 1e-9$), verification 3.29x (bit-identical).

Data / script: tools/stress_synth.py logs + tools/bench_strain3d.py.
